SUMMARY

Senior Software Engineer with 2.5+ years of experience building scalable, enterprise-grade applications in Oracle Cloud ERP. Experienced in Java, PL/SQL, SQL tuning with a strong focus on solving complex customer problems and enhancing backend architectures. Actively developing GenAI and AI agent–powered applications, driving customer innovation through cross-functional collaboration and high-quality engineering to deliver customer-centric solutions at scale.

EDUCATION

Master of Science (M.S) in Computer Science - **Santa Clara University**, Santa Clara, CA ***June 2023***

Bachelor of Engineering (B.E) in Computer Engineering - **University of Mumbai**, Mumbai, India ***June 2021***

Courses: Algorithms, Data Structures, Object Oriented Programming, Advanced Database Systems, Cloud Development, Distributed Systems, Operating Systems, Machine Learning, Artificial Intelligence, Microservices Architecture, Web Applications, Computer Networks, Data Analytics, Mobile Development, Design Patterns

EXPERIENCE

Oracle America Inc., Redwood City, CA

Senior Applications Engineer ***October 2025 - Present***

- Designed and developed GenAI-powered AI Agents for Collections, delivering a unified 360° Open Receivables workspace that aggregates invoices, payments, purchase orders, upstream transactions and external data into a single intelligent view, eliminating manual context gathering across systems.
- Led backend development for Consolidated Billing Terms, delivering REST APIs that enable flexible consolidation of charge lines across multiple sources into unified invoices, improving billing accuracy, configurability and scalability for enterprise customers.

Applications Engineer ***July 2023 - September 2025***

- Designed and delivered enterprise-grade payments workflows with third-party gateway integrations in Fusion Cloud ERP, cutting processing time, improving processing efficiency, ensuring PCI compliance and supporting large-scale financial operations.
- Synergized cross-functionally with Product Managers, Architects, UX and QA, streamlining Accounts Receivables (AR) and Payments by implementing customer-centric features from design through release, enhancing operational efficiency, reliability and alignment with business goals.
- Diagnosed and resolved production issues and data inconsistencies through structured debugging, SQL tuning and root-cause analysis, improving finance processing and system reliability with performance optimization, maintaining product efficiency for customer experience and success.
- Led end-to-end testing efforts, implementing robust unit tests, version control, refining product flows and validation strategies to ensure adequate test driven development and debugging for high code quality, data integrity and smooth release cycles across global environments.
- Collaborated to system design, REST API architecture and code reviews with CI/CD pipeline integrations and strong test coverage with detailed technical design documentation, peer mentoring on ERP concepts like VBCS and BOSS Spectra to support knowledge sharing and growth for organizations success.

Software Developer | SCU Frugal Innovation Hub, Santa Clara, CA ***February 2022 - June 2023***

- Devised web and mobile interfaces across Windows, Mac, Android, and iOS, providing accessibility to consumers in Africa, Asia, and Latin America.
- Prototyped UI and UX front end engineering design in Figma, leading to 85% increase in marketing, usability and enhancing the overall user experience.

Software Engineering Intern (Full Stack) | Intuitive Surgical Inc., Sunnyvale, CA ***June 2022 - September 2022***

- Functioned in the Core Technology Product Engineering team, focusing on design systems with integration, functional, unit and automated testing, and delivery of internal software applications using React and TypeScript, and aid in developing prototypes.
- Organized brainstorming sessions and software feature designs review with cross-functional teams to identify UX/UI features required for new product ideas and orchestration to collaborate with designers and developers to mockups and implement the final code approach for user interfaces.

SKILLS

Programming & Scripting Languages: Java, Python, C, C++, Objective C, Dart, JavaScript, TypeScript, Kotlin, XML
Front End Frameworks: Flutter, Android, React.js, Redux, React Native, Vue.js, Chakra-UI, Material-UI, Bootstrap, JSON, HTML/HTML5/XHTML, CSS/CSS3
Back End Frameworks: Node.js, Flask, AJAX, Django, J2EE, RESTful API, JSON, JUnit, DevOps, CI/CD Pipelines
Generative AI Technologies: AI Agents, Prompt Engineering, RAG, LangChain, Vector Databases, Tensorflow, PyTorch, OpenAI APIs, LLM, NLP, Deep Learning
Databases & Cloud Platforms: SQL, MySQL, PL/SQL, Oracle Database, Firebase, MongoDB, JDBC, Redis, AWS, Oracle Cloud Infrastructure, Docker, Kubernetes
Developer Tools & Libraries: Figma, Jira, Confluence, BitBucket, Canvas, Git, GitHub, Visual Studio, Postman, Jenkins, Linux, Windows
Soft Skills: Technical communication, detail oriented, problem solving, critical thinking, team collaboration, adaptibility, curiosity

PROJECTS

FlexPay - University Payment Application - *Java, JavaScript, OCI, Firebase, MongoDB, Node.js, Python*

- Devised a user-friendly e-commerce app that provides flex points for university payment transactions, hosted on an OCI computer instance. stored in MongoDB Atlas, with Multi-factor Authentication encrypted, utilized Nginx, Express for HTTP handling with multithreading and server management.

Social Media Analysis for Mental Health Evaluation - *Flask, Machine Learning, REST API, Firebase*

- Designed an ecosystem that analyses users' mental state using social media APIs and ML Natural Language Processing, CNN integration, providing an accuracy of 89.28%. Negative health alert, assisted by a medical chatbot with 92% project performance efficiency, further shows medical services nearby.

CERTIFICATIONS

- **Oracle** Cloud Infrastructure GenAI
- **Stanford University -** Machine Learning
- **LinkedIn -** Project Management Skills for Leaders

ACCOMPLISHMENTS AND INVOLVEMENT

- **Published a Project Research Paper** - "Social Media Analysis for Mental Health Evaluation" *IJRASET,* ISSN: 2321-9653, Volume 9 Issue IV Apr 2021
- **Judge & Mentor**: UnScript 2022: National Level Hackathon, India; **Built software projects** in hackathons including Smart India Hackathon 2020.
